PROJECTS

2024- EduConnect

Bridging students, educators, and opportunities through technology.

2025- HealthCare

A web application that helps users set reminders for taking medications and compare medicine prices across different pharmacies.

2025 - CareerPathr-Goal oriented planner

CareerPathr is an innovative, goal-oriented planner built with Python (Flask) and MongoDB. It helps users plan, track, and achieve their goals with a structured, user-friendly interface. The project is designed for students, professionals, and anyone looking to manage their personal or academic goals efficiently.

2025 - EcoTrack-Daily Sustainability Tracker

EcoTrack is a Python-based desktop application that helps users log, manage, and visualize their daily sustainable activities.
